ent in a situation (Wagner, 2005) An anxiety disorder is an extreme expression of anxiety Anxiety becomes problematic when it affects one's ability to engage in age-appropriate tasks or complete responsibilities Wagner defines the three responsibilities of childhood as learning, making friends, and having fun A simple method of dis-

Chapter 5 Theories of Pavlovian Conditioning

CR of fear is different than UCR of pain without UCS prior to learning weakens learning Shouldn't have any effect according to Rescorla-Wagner theory, but it does Cue-deflation effect - extinction of a more salient cue enhances learning for the less salient cue Should be no change according to R-W Comparator Theory If two CS's are associated, extinction of one should reduce

Fear conditioning and extinction: emotional states encoded ...

Fear extinction is viewed as learning about a negative relationship between a CS and a US; hence it has been termed 'inhibitory conditioning' [1] This learning process leaves the conditioning memory intact, as revealed by spontaneous recovery, renewal and reinstatement of fear in response to specific reminders [2,3] or unrelated stress or anxiety [4] Thus, after fear conditioning ...

Desirable Difficulties: Optimizing Exposure Therapy for ...

Insights from research on fear learning and extinction Repeated presentation of the CS (dogs) without the US (bite) Blake's fear of dogs is extinguished by repeated exposure to dogs without being bitten The association between dogs and dog bites is dampened Emotional Processing Theory Break the association between a conditioned stimulus ("trigger") and conditioned response (fear
